Contact Toni at
Servatororders@1gtsinc.com
to place your orders!

Our customers are important to us – both before and after they buy and use our product. We are on call 24/7/365 to help in any way possible. Call us today and let us **dazzle** you with our excellent customer service!

2022 was a record year for us at GTS and as we near the end of the first quarter of 2023, we are challenging ourselves to continue moving forward by doing the very best that we can to foster the mission of organ donation.

As the first step in accomplishing that goal, our warehouses are fully stocked with the entire portfolio of FDA cleared Servator® products (Servator® B, H, C, M and P) to meet the industries' demands.

In addition to greatly increasing our inventory to meet the demand, GTS continues to grow in every other aspect in order to support the need.

Watch for an announcement in the very near future about the opening of a **distribution center in Dallas, Texas**, which will be fully staffed by team members who can't wait to become residents of the Lone Star State!

The **GTS workforce is growing by leaps and bounds** with talented team members who are dedicated to the organ procurement industry. Check out the “**Meet the Staff**” section of our website to read all about them!

To better serve the needs of our customers and ensure that our product is delivered

in a timely and safe manner, we now have a fleet of six beautifully wrapped vehicles!

In addition to growing domestically, GTS' reach will be expanding with the development of **GTS International**...more news on that will follow in the next edition of our newsletter!

Global Transplant Solutions' 2023 schedule is filling up quickly with activities geared towards “Fostering the Mission”. Be sure to stop by and see us at events such as ISHLT, AOPO, NATCO, support-raising galas, golf tournaments and more!
